

Voted "Most Likely to Succeed in Solving the Climate Crisis."

#1 Fmr. Sen. John Edwards

"One of the goals of this transition to new forms of energy is not only to address this crisis of climate change, but also to strengthen the American economy... and strengthen the ability of Americans to earn a decent living from the bottom up."

#2 Rep. Dennis Kucinich

"When we understand that the individual choices we make have an impact on the globe, then as a president, that helps us move compassionately in a new direction... organizing the entire country along this area of green philosophy, everything changes."

#3 Sen. Hillary Clinton

"Global warming to me is an issue of economics because I think we can create a lot of green collar jobs. It's an issue about the environment, obviously, but it's also a moral and ethical issue. We have an obligation to clean up the mess."

MoveOn.org held virtual town hall meetings across America where Democratic candidates answered tough questions about their plans to address the climate crisis. Afterwards, members voted for the candidate who has the best plan to solve the crisis we face. As we move closer to primary elections, we hope the results will serve as a guide as you choose the next President of the United States.

Here's how all Town Hall Candidates ranked:

- | | |
|---------------------------|--------------------------|
| #1 Fmr. Sen. John Edwards | #5 Gov. Bill Richardson |
| #2 Rep. Dennis Kucinich | #6 Sen. Joe Biden |
| #3 Sen. Hillary Clinton | #7 Sen. Chris Dodd |
| #4 Sen. Barack Obama | #8 Fmr. Sen. Mike Gravel |
